

1.3.4.2 Reference Assignments

The tenderer must have experience of similar assignments as requested in this procurement. The offered Current Research Information System must have been previously delivered and implemented (in accordance with agreed functionality), by the tenderer, to at least five (5) different customers.

The customers must be higher education institutions in Europe and the system must have been delivered over the past five (5) years.

The deliveries used as a reference must be specified with name of the customer, contact person with relevant e-mail address, period of delivery and a short description of the scope and the contents of the deliveries.

The deliveries used as a reference must have been conducted according to agreed terms in the contracts. If the assignment is performed as part of a longer contract, or there is a recurring task, there is no need for the agreement to be completed.

The purpose of the customer reference is to enable Kristianstad University, in the event of doubt, to have the tenderer's technical and professional capacity and professional knowledge strengthened
